Er begegnet auf dem Weg dem Propheten Elia

Auf Grund dieser Begegnung lernte er:

Man soll nicht in ein verwüstetes Haus gehen

Man kann auf dem Weg beten

Wenn man auf der Reise betet,
so soll man kurz beten

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in the health sector has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase in the number of people employed in the public sector. One of the main reasons is the increasing demand for public services, particularly in the health sector. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are employed in the health sector, particularly in the areas of nursing and social care.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for public services in other areas, such as education and social services. The number of people who are employed in the education sector has increased from 1.5 million in 1990 to 2.5 million in 2000, and the number of people who are employed in the social services sector has increased from 0.5 million in 1990 to 1.5 million in 2000.

There are a number of reasons for this increase in the number of people employed in the public sector.
